

THE 5 PILLARS PYRAMID

PILLAR 1 – AWARENESS

It is imperative to know where you are, where you have been that got you there and most importantly, where you want to go.

PILLAR 2 – ENVIRONMENT

Once you have a firm grasp on your current condition, evaluate the current environment you are in and whether or not it is conducive to growth.

PILLAR 3 – GROWTH

Knowing where you are and where you want to be, along with an environment conducive to growth will allow you to start growing your skills and moving towards your potential.

PILLAR 4 – COMMUNICATION

Effective communication requires success within the first three pillars. Additionally, influential leaders communicate in a way that helps others to achieve more and move towards reaching their own potential.

PILLAR 5 – LEADERSHIP

Influential leaders know exactly where they are and where they are headed. If they don't have an environment conducive to their own growth or the growth of others, they create one. They are life long learners and are able to not only communicate, but connect with others.

As you progress through the Pillars, your ability to influence becomes greater.
